Use Fibonacci for story points (eg. 1, 2, 3, 5, 8t, ...)

#1 F1	Name	Customer wants to contact AGME via email	Priority	High
			Effort	
	As a	Customer		
	I want	To get the contract email for AGME		
	So that	I can contact AGME directly with enquiries		
	Acceptance criteria	1. Given the customer is on the homepage, when the customer views the contact us page, then display the contact us page and ensure the contact details are correct		

#2 F8	Name	Worker wants to see assigned working hours/days	Priority	High
			Effort	3
	As a	Worker		
	I want	To view my assigned working hours/days and services		
	So that	I know what days and time I have to show up for work		
	Acceptance criteria	1. Given that the worker has a profile and the worker is logged in and the worker has shifts, when the worker views assigned hours/days, then ensure the workers shifts are displayed and ensure the service being provided is being displayed and ensure the card is returned 2. Given that the worker has a profile and the worker is logged in and the worker does not have shifts, when the worker views the assigned hours/days, then ensure no shifts are displayed and ensure a message for no shifts is displayed.		

#3	Name	Customer wants to cancel a booking	Priority	High
F6			Effort	3
	As a	Customer		
	I want	To cancel a booking made		
	So that	I can place another booking for a time that I can attend		
	Acceptance criteria	1. <u>Given</u> that there is a valid booking and there is more than 48 hours until the booked time, <u>when</u> the customer requests to cancel the booking, <u>then</u> ensure the booking is cancelled and ensure the time booked becomes available for booking. 2. <u>Given</u> that there is a valid booking and there is less than 48 hours until the booked time, <u>when</u> the customer requests to cancel the booking, <u>then</u> ensure the rejection message is displayed and ensure the booking is not cancelled		

#4	Name	Users logging in securely	Priority	High
F1			Effort	3
	As a	User (any type of user)		
	I want	To be able to log in to the application securely using my personal credentials		
	So that	I can view information specific to me		
	Acceptance criteria	1. <u>Given</u> a registered user is on the home page and not logged in, <u>when</u> the log-in button is clicked, <u>then</u> prompt the user for their login details. 2. <u>Given</u> a registered user is not logged in, <u>when</u> the user attempts to access a page that requires being logged in, <u>then</u> prompt the user to log in before they can continue		

#5	Name	Admin adds a new employee		Priority	High
F3				Effort	
	As an	Admin			
	I want	To login into my admin account			
	So that	I can add a new employee to the system			
	Acceptance criteria	1. <u>Given</u> the admin's account is in the system and the admin is on the log-in form and the admin enters correct account information <u>when</u> the admin logs in and adds a new valid employee, <u>then</u> add the employee data to the database and display the new employee on the page. 2. <u>Given</u> a registered user is not logged in, <u>when</u> the user attempts to access a page that requires being logged in, <u>then</u> prompt the user to log in before they can continue			

#6	Name	Admin views worker availability		Priority	High
F3				Effort	
	As an	Admin			
	I want	To view a list of worker availability for the next 7 days			
	So that	I can organise a meeting with several workers			
	Acceptance criteria	1. <u>Given</u> the admin is securely logged in and there are workers available within the next 7 days, <u>when</u> the admin views the availability of the workers, <u>then</u> display the availability of the workers for the next 7 days. 2. <u>Given</u> the admin is securely logged in and there are no workers within the next 7 days, <u>when</u> the admin views the availability of the workers, <u>then</u> display that there are no workers available within the next 7 days			

#7	Name	Admin views past bookings		Priority	High
F3				Effort	
	As an	Admin			
	I want	To view a list of past bookings			
	So that	I can confirm that a customer had made a booking			
	Acceptance criteria	1. <u>Given</u> the admin is securely logged in and there are past bookings, <u>when</u> the admin attempts to view past bookings, <u>then</u> display all previous bookings. 2. <u>Given</u> the admin is securely logged in and there are no previous bookings, <u>when</u> the admin attempts to view past bookings, <u>then</u> display that there are no previous bookings			

#8	Name	Authenticate users based on their role		Priority	High
F1				Effort	1
	As a	User (any type of user)			
	I want	To be shown information specific to my user type			
	So that	I can perform tasks specific to my needs			
	Acceptance criteria	1. <u>Given</u> an admin wanting to log in, <u>when</u> the admin logs in, <u>then</u> display the administrator's dashboard relevant to the admin 2. <u>Given</u> a worker wanting to log in, <u>when</u> the worker logs in, <u>then</u> display the worker's dashboard relevant to the worker 3. <u>Given</u> a customer wanting to log in, <u>when</u> the customer logs in, <u>then</u> display the customer's dashboard relevant to the customer			

#9	Name	Allow customer registration	Priority	High
F2			Effort	3
	As a	Customer		
	I want	To register myself with the booking application		
	So that	I can book services		
	Acceptance criteria	1. <u>Given</u> a customer wanting to register and they have not already registered, <u>when</u> they fill out the registration form, <u>then</u> add the customer to the system as a new user and take them to their dashboard 2. <u>Given</u> a customer wanting to register and they have already registered, <u>when</u> they fill out the registration form, <u>then</u> notify the user they already have an account and request them to log in		

#10	Name	Allow customers to check service availability	Priority	High
F4			Effort	5
	As a	Customer		
	I want	To view the availability for a service		
	So that	Plan my schedule accordingly with what is available		
	Acceptance criteria	1. <u>Given</u> a customer wanting to book a service, <u>when</u> choosing a specific service, <u>then</u> display to the customer the available dates and times		

#11	Name	Allow customers to check service booking information	Priority	High
F4			Effort	5
	As a	Customer		
	I want	To view the information for a bookable service		
	So that	I can view the worker that providing the service		
	Acceptance criteria	1. <u>Given</u> a customer wanting to book a service, <u>when</u> choosing a specific service, <u>then</u> display to the customer information for the booking including the worker providing the service		

#12	Name	Allow customers to view details all personal they've given	Priority	High
F5			Effort	5
	As a	Customer		
	I want	To view the information I have given on the customer profile page		
	So that	I can view the data that is stored about me		
	Acceptance criteria	1. <u>Given</u> a customer wanting to view their information, <u>when</u> they go to their customer profile page, <u>then</u> display to the customer their name, username, address and contact number		

#13	Name	Allow customers to edit details all personal they've given	Priority	High
F5			Effort	5
	As a	Customer		
	I want	To view and edit the information I have given on the customer profile page		
	So that	I can make any necessary changes to my data in the case that it needs to be changed		
	Acceptance criteria	1. <u>Given</u> a customer wanting to edit their information, <u>when</u> they go to their customer profile page, <u>then</u> let the user edit their data including username, password address and contact number		

#14	Name	Allow at least 5 customers to be stored in the database		High
F5				3
	As an	Admin		
	I want	To be able to store at least 5 seperate users into the database		
	So that	I can let users insert their information and it be successfully stored and view them through their respective customer profiles		
	Acceptance criteria	1. <u>Given</u> an admin wanting to add their customer database, <u>when</u> the user adds their profile through the program, <u>then</u> the database must be able to handle at least 5 records		

#15	Name	Accessible home page		Priority	High
F8				Effort	3
	As a	Admin/Worker/Customer			
	I want	To be able to access a home page			
	So that	I can log in or view an 'about us' or 'contact us' page			
	Acceptance criteria	1. <u>The system should display a home page with login/sign-up functionality and an 'about us' and 'contact us' page</u>			

#16	Name	Allow employee data to be edited		Priority	High
F8				Effort	3
	As a	Admin			
	I want	Edit new employee data			
	So that	I can change employee work times			
	Acceptance criteria	1. <u>Edit employee data</u> 2. <u>Edit working times and dates for the next month</u>
